Interactive Mathematics Space / Fadaa ar-Riyadiyyat

Chapter 1: Numbers from 0 to 9

Introduction to foundational counting concepts and quantities.

Group objects by color, shape, and size.

Count the apples in the basket: 1, 2, 3, 4, 5.

LEARNING OBJECTIVES & KEY CONCEPTS

Focus: Direct 1-to-1 correspondence between objects and numbers.

Interactive Mathematics Space / Fadaa ar-Riyadiyyat

Chapter 2: Principles of Elementary Addition

Combining two distinct groups into a single total.

If you have 2 pencils and receive 3 more, how many do you have?

Mathematical formula: 2 + 3 = 5.

LEARNING OBJECTIVES & KEY CONCEPTS

Activity: Use physical counting blocks or fingers to verify sums.

Interactive Mathematics Space / Fadaa ar-Riyadiyyat

Chapter 3: Basic Shapes and Spatial Reasoning

Discovering circles, squares, triangles, and rectangles in daily life.

Identify which shapes roll and which shapes slide.

Spatial positions: Above, below, inside, outside, left and right.

LEARNING OBJECTIVES & KEY CONCEPTS

Geometric awareness: Classifying common geometric silhouettes.

Interactive Mathematics Space / Fadaa ar-Riyadiyyat

Chapter 4: Introduction to Measurement & Length

Comparing lengths: Longer than, shorter than, equal length.

Using non-standard units (paperclips, handspans) to measure objects.

Fun review challenges for the young mathematician.

LEARNING OBJECTIVES & KEY CONCEPTS

Applied reasoning: Ordering items from shortest to longest.
