Everyday Scientific Discovery / Al-Mufid fi an-Nashat

Lesson 1: The Human Body and Five Senses

Human beings explore and perceive the universe through five main senses.

Sight with eyes, hearing with ears, smell with nose, taste with tongue, touch with skin.

How each sense helps us stay safe and understand our surroundings.

LEARNING OBJECTIVES & KEY CONCEPTS

Sensory awareness: Keeping our sensory organs clean and protected.

Everyday Scientific Discovery / Al-Mufid fi an-Nashat

Lesson 2: Living Things and Nutrition

What makes a living creature? Movement, feeding, breathing, and growth.

Plants need sunlight, fertile soil, and clean water to flourish.

Animals require nutritious food and safe shelter.

LEARNING OBJECTIVES & KEY CONCEPTS

Ecosystem balance: Observing nature in the school garden.

Everyday Scientific Discovery / Al-Mufid fi an-Nashat

Lesson 3: Water in Our Daily Life

Water is precious for human health, agriculture, and sanitation.

Where does water come from? Rain, rivers, wells, and seas.

Simple rules for conserving water and avoiding waste.

LEARNING OBJECTIVES & KEY CONCEPTS

Civic responsibility: Saving water during daily handwashing.

Everyday Scientific Discovery / Al-Mufid fi an-Nashat

Lesson 4: Observing Motion and Toys

How things move: Pushing, pulling, sliding, and rolling.

Forces at play: Heavy versus light objects.

Scientific notebook summary and review.

LEARNING OBJECTIVES & KEY CONCEPTS

Hands-on experiment: Ramp rolling speeds with varied surfaces.
